NETFLIX | Global Streaming Intelligence Suite – Viewer Ratings Analysis

Report prepared and analytics conducted by Soham S. Amburle | 21 March 2026

The Viewer Ratings Analysis Dashboard provides a detailed and interactive analysis of audience feedback across a simulated global streaming platform inspired by Netflix. Built using Power BI and a synthetic dataset of approximately 2,394 records, the dashboard leverages a snowflake schema data model to replicate real-world streaming analytics.

This dashboard is designed to answer key business questions such as:

- How are ratings distributed across the platform?
- What percentage of ratings are high versus low?
- Which genres receive the highest ratings?
- Which content titles are most highly rated?
- How does audience feedback vary across content types?

Through KPI indicators, charts, and interactive slicers, the dashboard enables both executives and analysts to explore viewer sentiment effectively.

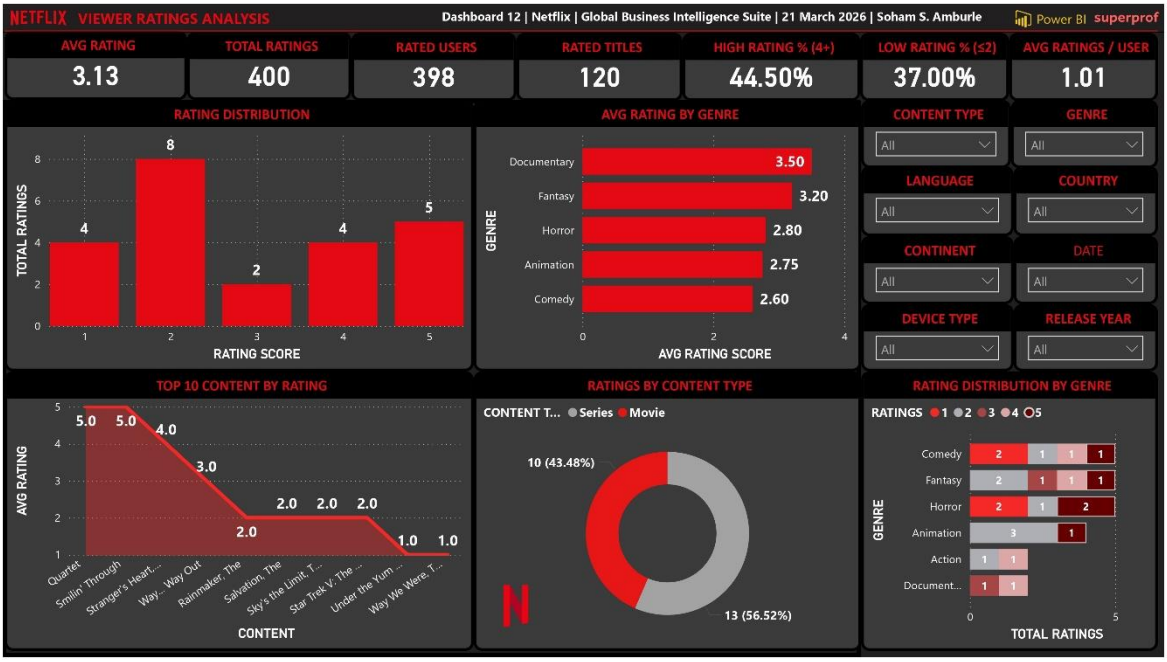

Fig 12.1 Viewer Ratings Analysis

Dashboard Storyline

The dashboard follows a structured analytical flow from overall rating metrics to deeper insights into audience preferences and content quality.

The first section presents KPI cards that summarize the overall rating landscape, including average ratings, rating volume, and user participation.

The second section focuses on rating distribution and genre-level insights, helping stakeholders understand how ratings vary across different content categories.

Data Disclaimer: This dataset is synthetic and created solely for learning, analysis, and portfolio demonstration. It does not represent real user data or actual activity from Netflix or any streaming platform.

The final section highlights top-performing content and content-type distribution, providing insights into audience satisfaction and content effectiveness.

This layered approach ensures both quick insights and detailed analysis.

Dashboard Elements

The dashboard consists of three primary components:

- KPI Cards for summary metrics
- Interactive Slicers for filtering
- Visual Charts for rating analysis

These elements create a dynamic and user-friendly analytical environment.

KPI Cards

Seven KPI cards provide a high-level overview of viewer ratings:

1. **Avg Rating**: Represents the overall average rating across all content.
2. **Total Ratings**: Indicates the total number of ratings given by users.
3. **Rated Users**: Shows the number of users who have submitted ratings.
4. **Rated Titles**: Displays the number of content titles that received ratings.
5. **High Rating % (4+)**: Percentage of ratings that are high (4 and above).
6. **Low Rating % (≤2)**: Percentage of low ratings (2 and below).
7. **Avg Ratings / User**: Average number of ratings provided per user.

These KPIs provide insights into engagement, satisfaction, and feedback intensity.

Slicers

Eight slicers enable dynamic filtering:

1. Content Type
2. Genre
3. Language
4. Country
5. Continent
6. Date (Year/Month)
7. Device Type
8. Release Year

These filters allow analysis across content categories, geography, time, and platform usage.

Main Visualizations

The dashboard includes five primary visuals:

1. **Rating Distribution (Column Chart):** Shows how ratings are distributed across score levels.
2. **Average Rating by Genre (Bar Chart):** Highlights which genres receive higher audience ratings.
3. **Top 10 Content by Rating (Area Chart):** Identifies the highest-rated content on the platform.
4. **Ratings by Content Type (Donut Chart):** Displays rating distribution across movies and series.
5. **Rating Distribution by Genre (Stacked Bar Chart):** Shows how rating scores are distributed within each genre.

Data Disclaimer: This dataset is synthetic and created solely for learning, analysis, and portfolio demonstration. It does not represent real user data or actual activity from Netflix or any streaming platform.

These visuals provide a comprehensive understanding of audience sentiment and content quality.

Business Value

This dashboard provides several key analytical benefits:

- Helps evaluate overall audience satisfaction and sentiment
- Identifies high-performing and underperforming content
- Enables genre-level quality assessment
- Supports content improvement and recommendation strategies
- Enhances decision-making for content acquisition and production

Overall, the dashboard serves as a viewer sentiment intelligence tool, enabling data-driven decisions to improve user experience and content quality.

Tools and Data

- Visualization Tool: Power BI
- Dataset: Synthetic global streaming platform dataset
- Total Records: Approximately 2,394 rows across all tables
- Data Model: Snowflake schema
- Tables Used in the Dashboard:
    - Fact Tables
        - Fact_WatchHistory
        - Fact_Subscriptions
        - Fact_Ratings
    - Dimension Tables
        - Dim_Users
        - Dim_Content
        - Dim_Time
        - Dim_Geography
        - Dim_Genre
        - Dim_Language
        - Dim_Device
        - Dim_SubscriptionPlan

The dataset was generated using Mockaroo to simulate typical streaming analytics scenarios such as subscriber distribution, subscription plans, global geography, and viewing behavior.

Data Disclaimer: This dataset is synthetic and created solely for learning, analysis, and portfolio demonstration. It does not represent real user data or actual activity from Netflix or any streaming platform.
