NETFLIX | Global Streaming Intelligence Suite – Global Streaming Insights

Report prepared and analytics conducted by Soham S. Amburle | 24 March 2026

The Global Streaming Insights Dashboard represents the capstone of the Global Streaming Intelligence Suite, providing an executive-level overview of platform performance across all major business dimensions.

Built using Power BI and a synthetic dataset of approximately 2,394 records, this dashboard integrates insights from multiple analytical domains including user engagement, content performance, revenue generation, and customer retention. The underlying snowflake schema data model ensures scalable and structured analysis, mirroring real-world streaming analytics systems.

This dashboard is designed for leadership teams who require a concise yet comprehensive view of platform health and strategic performance.

The dashboard addresses high-level strategic questions:

- What is the overall scale of the platform in terms of users, content, and streams?
- How engaged are users across the platform?
- How much revenue is being generated and from which plans?
- What type of content drives the most consumption?
- How does performance vary across global markets?
- What is the current state of customer retention and monetization?

Dashboard Storyline

The dashboard follows a top-down analytical structure, beginning with high-level KPIs and progressing into key performance dimensions.

Data Disclaimer: This dataset is synthetic and created solely for learning, analysis, and portfolio demonstration. It does not represent real user data or actual activity from Netflix or any streaming platform.

The first section presents a consolidated KPI snapshot, allowing executives to instantly understand platform scale, engagement levels, revenue performance, and churn metrics.

The second section focuses on geographic performance, using a global map to highlight regions with the highest engagement based on watch hours.

The third section shifts to content consumption insights, analyzing watch hours across genres to identify audience preferences.

The fourth section highlights revenue performance, breaking down revenue contribution by subscription plan to evaluate monetization strategies.

The final section presents content composition, showing the distribution between movies and series, helping stakeholders understand catalog structure.

This structured flow ensures that users can move seamlessly from high-level metrics to actionable strategic insights.

Dashboard Elements

The dashboard consists of three key components:

- KPI Cards for executive-level metrics
- Interactive Slicers for multi-dimensional filtering
- Visual Charts for performance analysis

Together, these elements create a powerful and intuitive executive dashboard.

KPI Cards

Eight KPI cards summarize the platform's performance:

1. **Total Users**: Total unique users on the platform
2. **Total Watch Hours**: Total engagement measured in hours
3. **Total Revenue**: Total subscription revenue generated
4. **Total Content**: Total content available in the catalog
5. **Avg Rating**: Average user rating across content
6. **Total Streams**: Total streaming sessions
7. **Churn Rate (%)**: Percentage of cancelled subscriptions
8. **ARPU**: Average revenue per user

These KPIs provide a unified view of growth, engagement, monetization, and retention.

Slicers

Eight slicers allow dynamic filtering:

1. Continent
2. Country
3. Content Type
4. Genre
5. Language
6. Subscription Plan
7. Gender
8. Age Group

Data Disclaimer: This dataset is synthetic and created solely for learning, analysis, and portfolio demonstration. It does not represent real user data or actual activity from Netflix or any streaming platform.

These slicers enable detailed analysis across geographic, content, and user dimensions.

Main Visualizations

The dashboard includes four key visuals:

1. **Global Streaming Map (Map):** Displays watch hours across countries to highlight regional engagement.
2. **Watch Hours by Genre (Bar Chart):** Shows which genres drive the highest user engagement.
3. **Revenue by Plan (Column Chart):** Breaks down revenue contribution across subscription tiers.
4. **Content Type Distribution (Donut Chart):** Displays the proportion of movies versus series.

These visuals provide a concise yet powerful overview of global performance, engagement drivers, and revenue streams.

Business Value

This dashboard delivers strong strategic value:

- Provides a single source of truth for executive decision-making
- Combines multiple analytical domains into one unified view
- Enables quick identification of performance trends and opportunities
- Supports strategic planning across content, pricing, and markets
- Enhances understanding of global user behavior and engagement
- Helps align business strategy with data-driven insights

As the final dashboard in the suite, it serves as a comprehensive executive intelligence layer, summarizing the entire analytics ecosystem.

Tools and Data

- Visualization Tool: Power BI
- Dataset: Synthetic global streaming platform dataset
- Total Records: Approximately 2,394 rows across all tables
- Data Model: Snowflake schema
- Tables Used in the Dashboard:
  - Fact Tables
    - Fact_WatchHistory
    - Fact_Subscriptions
    - Fact_Ratings
  - Dimension Tables
    - Dim_Users
    - Dim_Content
    - Dim_Time
    - Dim_Geography
    - Dim_Genre
    - Dim_Language
    - Dim_Device
    - Dim_SubscriptionPlan

The dataset was generated using Mockaroo to simulate typical streaming analytics scenarios such as subscriber distribution, subscription plans, global geography, and viewing behavior.

Data Disclaimer: This dataset is synthetic and created solely for learning, analysis, and portfolio demonstration. It does not represent real user data or actual activity from Netflix or any streaming platform.
